JOB VACANCY: Test Development Junior Engineer (Customer Support)

Are you passionate about engineering, problem-solving, and working directly with customers? We are looking for a motivated and detail-oriented individual to join our team as a **Test Development Junior Engineer (Customer Support)**. This role offers a great opportunity to grow your technical skills while bridging the gap between engineering development and customer needs.

Job Overview

As a Test Development Junior Engineer (Customer Support), you will assist in designing, developing, and maintaining product testing systems while providing technical support to customers. You will play a key role in ensuring that test solutions are effective, reliable, and aligned with both engineering standards and user requirements.

Key Responsibilities

1. Test System Design & Development

- Develop automated or manual test setups for PCBs, modules, or finished products
- Assist in creating test scripts, test jigs, and fixtures
- Collaborate with senior engineers to implement new testing methodologies

2. Debugging & Troubleshooting

- Identify root causes of test failures
- Work closely with design and production teams to resolve hardware or software issues

3. Process Improvement

- Suggest improvements to enhance testing efficiency, reliability, and automation
- Maintain calibration and performance of test equipment

4. Documentation

- Prepare test procedures, setup instructions, and maintenance records
- Ensure compliance with quality and safety standards

5. Customer Support

- Provide on-site or remote technical assistance to customers

- Diagnose test failures and recommend corrective actions
 - Conduct training sessions and prepare user documentation
 - Gather customer feedback to improve test systems and solutions
-

Requirements

- Diploma/Degree in Electrical, Electronics, Mechatronics, or related field
 - Basic knowledge of PCB testing, electronics troubleshooting, or automation is an advantage
 - Strong analytical and problem-solving skills
 - Good communication skills and willingness to work with customers
 - Fresh graduates are encouraged to apply
-

Why Join Us?

- Hands-on experience in real-world engineering applications
 - Opportunity to work with experienced professionals
 - Career growth in test engineering and customer support fields
 - Dynamic and supportive working environment
-

How to Apply

Interested candidates are encouraged to submit their application or contact us for more information:

OUR SERVICE

Functional Test System

- ATE Design (Automatic Test System)
- System Setup
- Test Instrument Integration
- GPIB, USB, Network Communication

Test Fixture

- Pneumatic or Cam Mechanism
- Guided probe plates
- Zero flex plates
- Top and Bottom side probing
- LED Color Checker
- Vision Checker

MANUFACTURING CAPABILITY

Wide range of sophisticated CNC machines to high quality milling, grinding, turning, wire-cutting & EDM facilities ect..

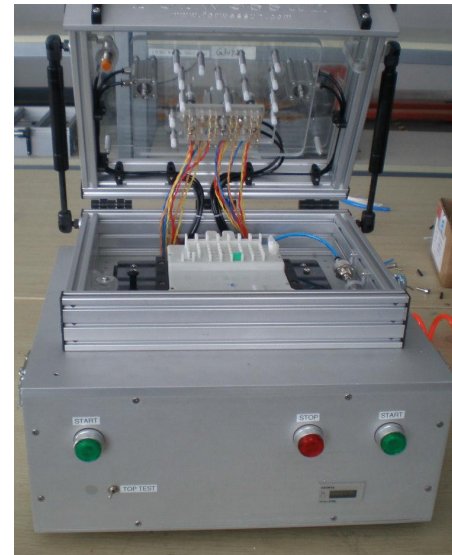

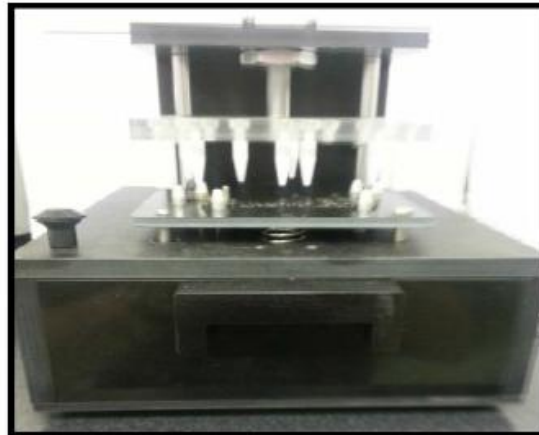

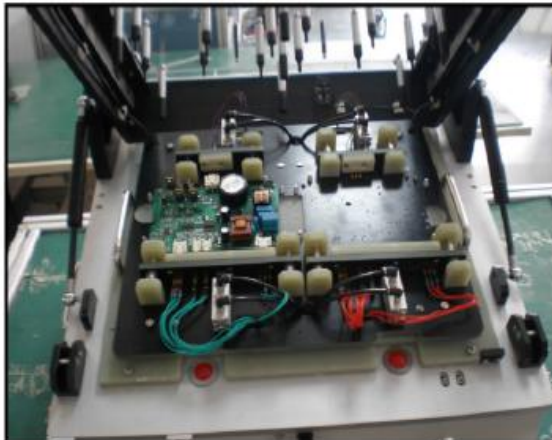

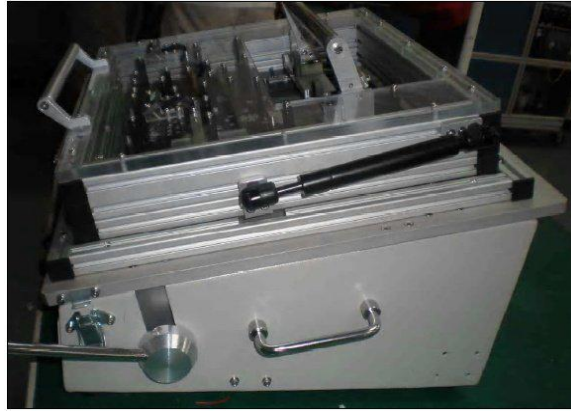

FUNCTIONAL TEST SYSTEM

Standalone test fixtures and solutions, dedicated functional team providing customized solutions for your product.

Electronics integrated, Electronics integrated, Pneumatically Controlled, support External Benchtop Instruments or Test System Rack

FUNCTIONAL TEST FIXTURE

SOFTWARE

Techniques employed includes :

- Labview Test Program
- PLC Programming
- Onboard Device programming
- Boundariescan
- JTAG
- Silicon nails and cluster tests
- BIST and functional test
